

ELECTRONIC INFORMATION SYSTEM

PULSE ASSURANCE

The Greenbank Pulse Assurance information system has been especially incorporated by Greenbank to increase efficiency. This software can be integrated with your compactor and can be adjusted to inform you of its operation. This system will keep you updated on the skip full levels; compactor service status and can also warn you in case of breakdown. Messages can be sent to your centre of operations via SMS, email or fax.

- **Maximise compactor payloads**
- **Minimise transport costs**
- **Reduce machine down time**
- **Increase profits**

Greenbank can install this system on both new and existing onsite equipment, so whether your compactor is new or has been in operation for several years, Greenbank can adapt the Pulse Assurance Information System to maximise your efficiency.

- **No extra power required**
- **Limited machine down time on installation**
