

Wheelie Bins

Greenbank can also supply you a full range of 2 or 4 wheeled bins. All certified according to EN840. These bins can be customised for your application including drop down fronts, security locks and special lifting points.

Supplied in either HDPE in most colours or galvanised steel.

Most common sizes include 240L, 360L, 660L, 770L and 1100L..

Office & Canteen Enviro Bins

Quality bins for internal use including offices, canteen, corridors and retail environments. These bins have been especially selected by Greenbank, not just for their robust and 'easy to clean' properties but also for their 'good looks' and aesthetically favourable design.

Available with many lids including confidential paper, cans, plastic bottles and general waste. Also option of split lids.

Screw Compactor Continuous Sack (lay flat tubing)

Special designed for screw compactor applications. All bags are transparent and are supplied on a roll for continuous use. Also known as lay flat tubing.

Code LFT 31/400
Code tie - plastic covered ties

Other Accessories

Bale Trolley

Heavy duty bale trolley for smaller baler applications. This can be supplied as an extra or replacement in case of damage

Code: **GB3TR01**

Bale hooks

Necessary extra to ease bale tie off on vertical bale presses. This hook is suitable for many makes of machine and can be supplied as an extra for smaller balers or as a replacement.

Code: **BHK400**

Bale spray

Do you have difficulty in removing tight bales from the smaller balers? Use this spray to make life that bit easier.

Code: **BS500**

Maintenance spray

Oil based maintenance spray for general lubrication of moving parts such as door handles and safety guards. Supplied in a 500ml aerosol.

Code: **MS500**

Grease and grease gun

Essential tool for in house maintenance of both balers and compaction equipment. Supplied with a replacement cartridge.

Codes: **GSEGN**
GSE250

Bale cut knife

Specially designed bale twine and strapping safety knife. This knife is designed to maximise the safety for the operator and is of a heavy duty construction to ensure reliability during a hard life. Also comes with a spare replacement blade.

Code: **BLK31**

Bale wire cutters

These special wire cutters have been chosen to help the operators to tie off and finish a quality mill size bale. These cutters can be used to twist the wire (if required) and cut off surplus lengths to ensure ease of handling.

Code: **PS5429**

Wire tie gloves

These gloves have been specially selected to assist the operators when tying wire on mill size bales. This can be a difficult task and these gloves will keep the users hands clean & safe to help make the job that one bit easier.

Code: **WTG388**

Accessories for baling, compacting & recycling

Polythene Compactor Sacks

Black, heavy duty (gusseted) bags. Suitable for Greenbank bag compactor models P120 and Bag Press including many other makes. Widely used with rotary compactors, Greenbank model RP7700 and many other makes.

Codes:

- **BG203447**
P120 bag press models
- **BG527287**
Rotary compactor (round)
- **BG509090**
Rotary compactor (square)

Polythene Sacks other applications

Stuffer frames

All bags are clear and perforated to maximise bag capacity. Available in 2 sizes 280 & 400

Codes:

- **BG280SF - 280 litre**
- **BG400SF - 400 litre**

Stuffer Frames

A low cost solution for collecting, segregating and bulking up polythene, strapping and paper.

OPERATION

Pallet wrap and such materials are pushed through the narrow loading neck at the top of the frame into the bag below. The narrow neck stops the materials expanding out of the bag. Keep loading the bag until full. The bag can then be released and tied ready for onward transport or storage until baling.

EASY TO ASSEMBLE

Each frame comes flat packed with easy to follow assembly details. Each frame will take approx 5 minutes to make.

OPTIONS

The polythene recycling frame is available as a static, stand alone version, on castors or can be bolted to the side of a baler or compactor.
